OBJECTIVE

Looking for a cross-functional role at a fast-paced, early-stage startup where I can wear multiple hats and offer value in a tremendous variety of ways. Highly ambitious and a professional, I am most excited and challenged when quickly learning new skills across disciplines, from full-stack web development to a strong background in business and finance.

SKILLS			
Back-End:	Ruby/Rails	ActiveRecord/SQL, Rspec/Capybara testing	Rails API that connects with a JS front-end
Front-End:	Javascript/JQuery	Ember.js/Backbone.js	HTML/CSS
CS Concepts:	Algorithms with Big O notation	Data structures (stacks and queues)	Object-Oriented Design as applied to Rails

EXPERIENCE

BeaconHeroes.com

March 2014 – May 2014

Developer, Beacon matches kids who have experienced trauma to good causes. In the process of healing through helping others, kids become online superheroes.

Key Accomplishments

- Built out the minimum viable product as the sole developer to pitch the company for MassChallenge and developed KPIs to measure success of the platform going forward.
- Took the company to the final round of the MassChallenge (~300 companies out of 1600 applicants) selection process, presenting to experienced judges from a variety of backgrounds.

Startup Institute

March 2014 – April 2014

Web Development Track, An intensive 8-weeks of learning the mindset and skills to thrive in a fast-paced, constantly changing startup environment, from emotional intelligence to relevant technical skills.

Key Accomplishments

- Partner Project: Built an online platform prototype to help communities recover from tragedy, based on the findings, research and experience of a non-profit organization in Newtown, CT.
- Practiced pair programming and the pomodoro technique in developing a restaurant reservation system using a variety of gems and external APIs such as Google Maps.
- Discussed what makes a great employee, from having self-initiative with a growth mindset to a self-awareness of one's own strengths and weaknesses, as well as the different communication styles on a team.
- Attended networking events to learn about companies and weekend hackathons to work on cool projects.

PricewaterhouseCoopers

November 2012 – November 2013

Experienced Associate, Excelled on all parts of the CPA. Analyzed financial data and performed due diligence research to determine accounting and tax implications for corporate clients. Left to pursue interests and passions in technology that make a positive difference in people's lives.

EDUCATION

Boston College Carroll School of Management

May 2012

Bachelor of Science in Finance and Accounting, Minor in Chinese
